THERMOCHIMICA ACTA, VOLUME 40 (1980)

SUBJECT INDEX

Adiabatic calorimetry,
— and alternative energy production (Lamprecht, Schaarschmidt) 157
Aerobic metabolism,
the caloric equivalent of ATP exchange in — and anoxic metabolism (Gnaiger) 195
Al_2O_3,
study of the hydration products of the system CaO— — —SO_3—SiO_2 with varying CaO mole ratio (Khalil, El-Didamony) 337
Alternative energy production,
adiabatic calorimetry and — (Lamprecht, Schaarschmidt) 157
Ammonium bicarbonate,
a TG study of the kinetics of decomposition of ammonium carbonate and — (House) 225
Ammonium carbonate,
a TG study of the kinetics of decomposition of — and ammonium bicarbonate (House) 225
p-Anisidinium ions,
acid dissociation constants of *m*-toluidinium ions and — in formamide at different temperatures (Mukhopadhyay, Nayak) 433
Anoxic metabolism,
the caloric equivalent of ATP exchange in aerobic and — (Gnaiger) 195
Anthracene,
calorimetric studies of binary systems of 1,3,5-trinitrobenzene with naphthalene, — and carbazole. I. Phase transitions and heat capacities of the pure components and charge-transfer complexes (Radomska, Radomski) 405
Anthracene,
calorimetric studies of binary systems of 1,3,5-trinitrobenzene with naphthalene, — and carbazole. II. Phase diagrams (Radomska, Radomski) 415
ATP exchange,
the caloric equivalent of — in aerobic and anoxic metabolism (Gnaiger) 195

Baker's yeast,
microcalorimetric investigations of partially synchronous cultures of — (Sayyadi et al.) 63
Benzoic acid,
heats of immersion of boron phosphates in pyridine and magnesia in — solution (Hattori, Tamamoto) 261
N-Benzoyl-glycyl-L-valine,
complexation reaction of metal ions with peptide systems. VII. Equilibrium studies of *N*-benzoyl-L-valine, — and isovaleric acid with metal(II) ion systems (Sandhu, Kalia) 305
N-Benzoyl-L-valine,
complexation reaction of metal ions with peptide systems. VII. Equilibrium studies of —, *N*-benzoyl-glycyl-L-valine and isovaleric acid with metal(II) ion systems (Sandhu, Kalia) 305
Boron phosphates,
heats of immersion of — in pyridine and magnesia in benzoic acid solution (Hattori, Tamamoto) 261

$CaCrO_4$,
the Li_2CrO_4— — binary phase diagram (Karnowsky et al.) 389
Cadmium silicon diarsenide,
in vacuo thermal decomposition of —, $CdSiAs_2$ (Smith et al.) 235
Caffeine hydrate,
composition, properties, stability and thermal dehydration of crystalline — (Bothe, Cammenga) 29
Calorimetry,
historical notes on — (Hemminger) 41
CaO,
study of the hydration products of the system — —Al_2O_3—SO_3—SiO_2 with varying — mole ratio (Khalil, El-Didamony) 337
Carbazole,
calorimetric studies of binary systems of 1,3,5-trinitrobenzene with naphthalene, anthracene and —. I. Phase transitions and heat capacities of the pure components and charge-transfer complexes (Radomska, Radomski) 405

Carbazole,
calorimetric studies of binary systems of 1,3,5-trinitrobenzene with naphthalene, anthracene and —. II. Phase diagrams (Radomska, Radomski) 415
Carbonates,
the appearance of a compensation effect in the rising temperature decomposition of a series of pure — (Dollimore, Taylor) 297
Cellulose,
— thermally decomposes at 70°C (Kosiewicz) 319
Chemotherapeutics,
microcalorimetry for the determination of the activities of — (Semenitz) 99
Chromatin sub-unit,
calorimetric measurement of an ordered — (Klump) 177
Complex reactions,
non-isothermal kinetics and thermogravimetric analysis of —. I. Formal and approximate solution of the kinetics of homogeneous systems (Kříž) 427
Copper calcine,
application of Mössbauer spectroscopy in pyritic and — studies (Dimitrov et al.) 349

Devitrification of glasses,
surface and bulk crystallization in non-isothermal — (Marotta et al.) 397
Differential calorimeter,
construction of a — for the determination of heats of alloying and transformation between 800 K and 1600 K (Hoster Kubaschewski) 15

Electrical conductor,
measurement of the specific heat capacity of an — by the pulse method (Hanitzsch) 121
Elongation calorimeter,
conversion of a P. Barberi M.C.B. type microdifferential calorimeter to an — (Miller, Höhne) 137
Enthalpimetric measurements,
— in solid—solid reactions. IV. The study of the uranyl nitrate—thiourea system by DSC (Abate, Siracusa) 283
Excess enthalpies,
pressure dependence of the — of liquid mixtures (Heintz, Lichtenthaler) 93

Formamide,
acid dissociation constants of *m*-toluidinium and *p*-anisidinium ions in — at different temperatures (Mukhopadhyay, Nayak) 433

Halogen boracites,
thermal decomposition of — (Delfino, Gentile) 333
Heat flux calorimetry,
— on human skin (Sick et al.) 19
Heat of alloying,
construction of a differential calorimeter for the determination of — and transformation between 800 K and 1600 K (Hoster, Kubaschewski) 15
Heat of transformation,
construction of a differential calorimeter for the determination of heats of alloying and — between 800 K and 1600 K (Hoster, Kubaschewski) 15
Human skin,
heat flux calorimetry on — (Sick et al.) 19

Isovaleric acid,
complexation reaction of metal ions with peptide systems. VII. Equilibrium studies of *N*-benzoyl-L-valine, *N*-benzoyl-glycyl-L-valine and — with metal(II) ion systems (Sandhu, Kalia) 305
Indium,
heats of transition and melting of sodium nitrate by differential scanning calorimetry: use of — and sodium nitrate as calibration substances (Zeeb et al.) 245

Li_2CrO_4,
the — —$CaCrO_4$ binary phase diagram (Karnowsky et al.) 389
Liquid mixtures,
pressure dependence of the excess enthalpies of — (Heintz, Lichtenthaler) 93

Magnesia,
heats of immersion of boron phosphates in pyridine and — in benzoic acid solution (Hattori, Tamamoto) 261
Mass spectrometry,
techniques for coupling — to thermogravimetry (Chiu, Beattie) 251
Metal ions,
complexation reaction of — with peptide systems. VII. Equilibrium studies of *N*-benzoyl-L-valine, *N*-benzoyl-gly-

cyl-L-valine and isovaleric acid with metal(II) ion systems (Sandhu, Kalia) 305
Mixtures, calorimetry of — (Becker) 1

Naphthalene,
calorimetric studies of binary systems of 1,3,5-trinitrobenzene with —, anthracene and carbazole. I. Phase transitions and heat capacities of the pure components and charge-transfer complexes (Radomska, Radomski) 405
Naphthalene,
calorimetric studies of binary systems of 1,3,5-trinitrobenzene with —, anthracene and carbazole. II. Phase diagrams (Radomska, Radomski) 415

Particle size distribution,
the effect of — on TG (Lahiri) 289
Peptide systems,
complexation reaction of metal ions with —. VII. Equilibrium studies of *N*-benzoyl-L-valine, *N*-benzoyl-glycyl-L-valine and isovaleric acid with metal(II) ion systems (Sandhu, Kalia) 305
Polyamides,
DSC behaviour of — and polyesters annealed respectively in water or hot air (Vaníček, Berka) 327
Polyesters,
DSC behaviour of polyamides and — annealed respectively in water or hot air (Vaníček, Berka) 327
Pyridine,
heats of immersion of boron phosphates in — and magnesia in benzoic acid solution (Hattori, Tamamoto) 261
Pyritic calcine,
application of Mössbauer spectroscopy in — and copper calcine studies (Dimitrov et al.) 349

Radiation biophysical research,
development of a microcalorimetric procedure for — (Brandenburg, Meissner) 109
Radioactive materials,
the calorimeter as an apparatus for measuring the activities of — (Ramthun) 145
Reaction calorimeter,
— and stirred reaction vessel with improved heat transfer coefficient (Mirtsch et al.) 167

SiO_2,
study of the hydration products of the system $CaO—Al_2O_3—SO_3—$ — with varying CaO mole ratio (Khalil, El-Didamony) 337
SO_3,
study of the hydration products of the system $CaO—Al_2O_3—$ — —SiO_2 with varying CaO mole ratio (Khalil, El-Didamony) 337
Sodium nitrate,
heats of transition and melting of — by differential scanning calorimetry: use of indium and — as calibration substances (Zeeb et al.) 245
Solid—solid reactions,
enthalpimetric measurements in —. IV. The study of the uranyl nitrate—thiourea system by DSC (Abate, Siracusa) 283
Specific heat capacity,
measurement of the — of an electrical conductor by the pulse method (Hanitzsch) 121
Sulfaguanidine,
study of polymorphic transformations of — during compression (Masse et al.) 377

Thallium(I) monohydrooxalate,
some studies on thallium oxalates. III. The thermal decomposition of — (Prasada Rao, Ramana) 311
Thallium oxalates,
some studies on —. III. The thermal decomposition of thallium(I) monohydrooxalate (Prasada Rao, Ramana) 311
Thermodynamic temperatures,
on the international position of the approximation of — by temperature scales (Schley) 73
Thermogenesis,
—: experimental approach to a reduced transference function (Cesari et al.) 269
Thermogravimetry,
techniques for coupling mass spectrometry to — (Chiu, Beattie) 251
Thiourea—uranyl nitrate,
enthalpimetric measurements in solid—solid reactions. IV. The study of the — system by DSC (Abate, Siracusa) 283

m-Toluidinium ions,
acid dissociation constants of — and *p*-anisidinium ions in formamide at different temperatures (Mukhopadhyay, Nayak) 433
1,3,5-Trinitrobenzene,
calorimetric studies of binary systems of — with naphthalene, anthracene and carbazole. I. Phase transitions and heat capacities of the pure components and charge-transfer complexes (Radomska, Radomski) 405
1,3,5-Trinitrobenzene,
calorimetric studies of binary systems of — with naphthalene, anthracene and carbazole. II. Phase diagrams (Radomska, Radomski) 415
Uracil,
Thermodynamic study of the vaporization of — (Bardi et al.) 275
Uranyl arsenates,
the formation and stability of hydrated and anhydrous — (Barten, Cordfunke) 367
Uranyl nitrate—thiourea,
enthalpimetric measurements in solid—solid reactions. IV. The study of the — system by DSC (Abate, Siracusa) 283
Uranyl phosphates,
the formation and stability of hydrated and anhydrous — (Barten, Cordfunke) 357
